PROFESSIONAL SUMMARY

Computer science researcher and engineer specializing in ML-driven intelligent systems and scalable backend architectures. Proven expertise in optimizing data pipelines for 50,000+ users and achieving significant accuracy improvements in image processing. Experienced in applying research methodologies and algorithm optimization to solve complex real-world technical challenges.

EDUCATION

Christ (Deemed to be University)

Master of Computer Applications (MCA)

Christ (Deemed to be University)

Bachelor of Computer Applications (BCA); CGPA: 3.42/4.0

Bengaluru, India

June 2026 – May 2028

Bengaluru, India

May 2023 – May 2026

RESEARCH & PUBLICATIONS

IDSCS-2025 International Conference

Primary Researcher & Co-Author

2025

Bengaluru, India

- Co-authored "Smart Spend Analyzer" investigating ML-powered SMS parsing for automated financial transaction analysis using NLP.
- Developed an ML pipeline achieving 92% accuracy in processing 10,000+ messages to generate actionable predictive analytics.
- Engineered a preprocessing framework reducing noise in unstructured data by 40%, enabling robust pattern recognition across formats.

PROFESSIONAL EXPERIENCE

Moneywise Eloquent News and Views Pvt Ltd

Technical Intern

Oct 2025 – Mar 2026

Bengaluru, India

- developed a website and Moblie application to increase digital presence of the company
- Single Han-deadly developed the website and Moblie Application for the company.
- Automated the manual subscripton process for the financial magazine.

Sriram Gifts and Trophies

Front End Developer

July 2024 – Sept 2024

Bengaluru, India

- Developed a high-performance Single Page Application (SPA) using html,css and javascript to enhance the brand's digital presence and accessibility.
- Integrated a floating WhatsApp communication layer via the whatsapp API to facilitate direct customer engagement and lead conversion.
- Implemented dynamic client-side gallery filtering to allow seamless navigation across multiple gift and trophy categories.

Kaha Technologies Pvt Ltd

Full Stack Developer Intern

May 2024 – Jun 2024

Bengaluru, India

- Engineered Java Spring Boot services reducing API latency by 45% through strategic implementation of optimization and caching.
- Designed RESTful APIs supporting 1,000+ concurrent IoT devices using MySQL for optimized large-scale data storage.
- Built a responsive Angular frontend that improved user engagement by 35% through intuitive UI components and optimized design.

TECHNICAL PROJECTS

Kannada OCR System | Python, OpenCV, Tesseract

2024

- Achieved a 25% improvement in recognition accuracy on regional datasets through advanced binarization and noise removal.
- Developed an end-to-end image processing pipeline implementing optimized segmentation across a dataset of 5,000+ images.
- Refined character extraction workflows using OpenCV to handle diverse document formats with complex background noise.

Memory Management Simulator | Python, Streamlit

2024

- Demonstrated a 30% reduction in external fragmentation through simulation of First Fit and Best Fit allocation strategies.
- Built an interactive visualization dashboard using Streamlit with 50% faster execution speeds for large-scale scenario modeling.
- Simulated 1,000+ resource allocation scenarios to analyze algorithm performance under varying memory stress conditions.

TECHNICAL SKILLS

Languages: Python, Java, C++, C, JavaScript, SQL

Web/Frameworks: HTML, CSS, JavaScript, Restful Apis

Cloud/DevOps: GCP, AWS, Docker, Git, Linux, CI/CD

CERTIFICATIONS

Google Cloud Computing Foundations – Verify Badge

AWS Academy Graduate Cloud Foundations – [Verify Badge](#)
